### **DETAILED ACTION**

1. According to a preliminary amendment filed on Jan. 3, 2006, the applicants have amended claims 4-8, 10, 11, 13 and 17-20.
2. Claims 1-20 are pending in the application.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claim 1 as well as in claim 12, the term --- substantially --- is indefinite since its meaning is not clear. The meaning of this term is not defined in the specification. In the instant claims, the solvent is replaced either partially or completely with a non-solvent and therefore, the actual intent of this term is not clear.

In claim 6, the term --- obtained further to addition of finasteride to said solvent ----- is vague and indefinite since its meaning or the actual intent is not clear.

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 13-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McCauley ( U. S. Patent 5,652,365, cited on applicant's form 1449 ).

McCauley discloses Finasteride form I and teaches inhibition of 5-alpha reductase by finasteride as well as its use for treating various disease conditions ( see col. 1, lines 15-22 as well as example 3 and claims 1-2 ). The Finasteride form I disclosed by McCauley in example 3 as well as claims 1-2 clearly anticipates the instant claims.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over McCauley ( U.S. patent 5,652,365, cited on applicant's form 1449 ).

McCauley discloses a process for preparing polymorphic form I of Finasteride ( see col. 6, lines 4-64 as well as example 3 and claims 1-2 ). The process disclosed by McCauley meets all the limitations of instant claims except McCauley does not teach replacing the solvent with a non-solvent. However, McCauley uses exactly the same non-solvents such as toluene, water or isopropyl acetate as used in the instant process for crystallizing Finasteride form I. Therefore, it would have been obvious to one skilled in the art to prepare Finasteride form I by crystallizing it from a solution of finasteride in a water immiscible solvents such as toluene or isopropyl acetate unless applicants provide unexpected result of their process over the process disclosed by McCauley either in example 3 or claims 1-2.
